---

The double glass structure is more robust than glass-backsheet modules, offering better resistance to harsh weather conditions such as strong winds and heavy snow loads.

Moveable sash glass panel shall consist of 3/4" thick insulated glass. Glass to be held securely in place with silicone and with rigid, extruded, vinyl, interior glazing beads.

In cool weather, insulated glass provides outstanding thermal performance to keep interior glass surfaces closer to room temperature, eliminating cold spots near windows

Determine the weight of glass based on its dimensions and type. Useful for window installations, custom glass, and more.

This calculator allows you to estimate the weight of individual glass components and configurations based upon the nominal thickness, shape, size, type and number of glass ...

Replacement model 1650: Featuring superior styling, handcrafted quality, and exceptional long-term performance. Features like beveled sashes and eight exterior color options complement ...

**BUILT TO LAST** Our PV modules are designed with better technology in mind, made from robust product components, under stringent quality control steps and high-tech manufactu.

These advanced engineering and aesthetic details that go into every 1650 double-hung make it the ideal replacement window for any remodeling or renovation project.

Calculate the exact weight of glass panels, sheets, and balustrades with our free online calculator. Perfect for architects, ...
