Joel Santos, minister of energy and mines in the Dominican Republic, announced a goal of 300 MW of battery energy storage systems (BESS) by 2027 during a speech at a ...

A natural gas power plant that floats on water will be built in the Dominican Republic and equipped with a battery energy storage system supplied by Fluence.

When Hurricane Fiona knocked out power for 1.2 million Dominicans in 2022, mobile ESS units kept 14 water purification plants operational. The systems" rapid deployment capability proved ...

With SeaFloat, our engineers have created a trailblazing, highly efficient floating power plant on a mobile, self-supporting barge. One of our most recent projects is the Estrella del Mar III power ...

Through this analysis, new technical and financial regulations will be recommended to support the deployment of battery energy storage systems throughout the ...

To foster the development of energy storage, the Dominican Republic has established a supportive regulatory framework for this emerging technology. The national ...

Construction has started on the first major solar-plus-storage project in the Dominican Republic, which features a 24.8MW/99MWh battery energy storage system (BESS).

The stakeholders estimated that by 2028, the Dominican Republic will need to deploy between 250 to 400 MW of energy storage systems. Their projection is based on the ...

Joel Santos, minister of energy and mines in the Dominican Republic, announced a goal of 300 MW of battery energy storage ...

A notable achievement is the upcoming launch of the first four-hour energy storage system linked to a solar project, set to be operational by mid-2025. This system will participate ...
