The Ewoyaa lithium project is located approximately 100km south-west of Ghana's capital city Accra. The project area covers two contiguous licences, namely Mankessim (RL ...

The Ewoyaa Lithium Project, developed by Atlantic Lithium, is set to become Ghana's first lithium-producing mine. Located in West Africa, the mine is currently 100% ...

The Ewoyaa lithium project, developed by Atlantic Lithium, is expected to start production in 2025 and reach its full capacity of 365,000 tonnes of lithium annually in 2026. ...

Benefitting from operating in a well-established mining jurisdiction, Atlantic Lithium hopes to accelerate its route to lithium production, in turn launching Ghana's role in the global ...

Atlantic Lithium, which is listed on the ASX, AIM and the Ghana Stock Exchange, now has all the permits required to allow it to break ground on its Ewoyaa lithium project in ...

The Company's flagship project, the Ewoyaa Lithium Project, set to be Ghana's first lithium-producing mine, is being advanced to production under an agreement with Piedmont Lithium.

This article explores how lithium-rich resources and innovative battery technologies will reshape energy storage solutions for solar power, industrial applications, and grid stability.

The Government of Uganda has authorised engineering, procurement, and construction (EPC) contractor Energy America to build a 100MWp solar PV plant, integrated with a 250MWh ...

Atlantic Lithium plans to fast-track early production and cash flow by commissioning a modular 15,000 tonne per annum DMS plant in Q1 2025 ahead of the main ...

The Ewoyaa Lithium Project, developed by Atlantic Lithium, is set to become Ghana's first lithium-producing mine. Located in West ...
