Could lithium be used to produce batteries in Afghanistan?

The Taliban spokesman even mentioned the possibility to use the lithium to produce batteries inside Afghanistan and export them. Such a prospect appears far-fetched though. [Afghanistan has all the raw materials necessary to produce lithium-based batteries](#), Dr. Wnuk told SIGA.

Is Afghanistan a potential epicenter for lithium extraction?

The narrative of Afghanistan as a potential epicenter for lithium extraction introduces a new dimension to the international race for sustainable resources, emphasizing the intricate interplay between geopolitics, energy transition, and the critical role of lithium in shaping the future of transportation.

Are lithium-made batteries the future of EV technology?

Lithium-made batteries, heralded for their enhanced efficiency and compact design, have become the cornerstone of EV technology. For nations aspiring to lead in the burgeoning realm of EV production, securing an uninterrupted lithium supply chain is not merely a strategic choice but a fundamental necessity.

Should lithium-containing rocks be shipped abroad?

However, Dr. Wnuk cautioned that the effectiveness of teaching locals to do this has its limits. Another prospect would be to at least pre-process and pre-sort lithium-containing rocks in Afghanistan before shipping them abroad which would lower transport costs, as much less waste rock would be shipped.
