The construction of base station allows to store UAVs with large dimensions, weighting up to 12 kg. The top level of the station consists of a retractable roof and meteo-sensors.

A globally interconnected solar-wind power system can meet future electricity demand while lowering costs, enhancing resilience, and supporting a stable, sustainable ... tricity demand ...

Perfect for communication base stations, smart cities, transportation, power systems, and edge sites, it also empowers medium to high-power sites off-grid with an energy-efficient, hybrid ...

The EPC project will cover the design, procurement, construction, commissioning and other links of photovoltaic power ...

Based on the latest agreement, Daewoo E& C will have exclusive use of the ship "Gang Hang Ping 5," which is currently under construction by CCCC, for a period of five years.

As a key player in the offshore wind power industry chain, the Third Harbor Engineering Company has undertaken the construction of Asia's first offshore wind farm ...

This is the world's first smart zero carbon container terminal, which incorporates a distributed photovoltaic system across 16,000 square meters of rooftop and installs two wind ...

As a key player in the offshore wind power industry chain, the Third Harbor Engineering Company has undertaken the construction of ...

The EPC project will cover the design, procurement, construction, commissioning and other links of photovoltaic power stations and electrochemical energy storage power ...

They offer portable, scalable, and reliable power sources for remote locations, disaster relief, and industrial
