---

The comprehensive power management system provides the ability to automatically switch between AC and DC input power, to move to battery operation in the case of power ...

Maximum base station power is limited to 38 dBm output power for Medium-Range base stations, 24 dBm output power for Local Area base stations, and to 20 dBm for Home base stations.

To minimize shock hazard, the station equipment cabinet must be connected to an electrical ground. The equipment supplied is equipped with a three-conductor AC power cord.

HGM6120T Genset Controller integrates digital, intelligent and network technology, which is used for the automation and monitoring system of ...

The standard in safety and outdoor reliability, Roam's line of Power Output Panels makes connecting building (line) power to external or internal ...

The control panel provides the user with hardware controls and connections for direct control of the base station. Three models are available: dual base station, Power Save, and multi-reciter.

A modular design, combined with intuitive programming software, makes this Base Station/Repeater an ideal P25 solution for conventional, trunked and simulcast mission-critical ...

Monitoring and controlling the performance of a base station's PA makes it possible to maximize the output power while achieving optimum linearity ...

This manual provides general, performance and physical specifications for the TB9100 5W, 50W and 100W base stations, the P25 CG console gateway, and P25 TAG trunked analog gateway.

Monitoring and controlling the performance of a base station's PA makes it possible to maximize the output power while achieving optimum linearity and efficiency.
