Developers expect to bring more than 300 utility-scale battery storage projects on line in the United States by 2025, and around 50% of the planned capacity installations will be ...

Here are ten notable innovations taking place across different energy storage segments, as highlighted in GlobalData's Emerging Energy Storage Technologies report.

Once built, DCEP will be the largest battery energy storage system in the world, highlighting California's leadership in clean energy innovation and infrastructure.

Battery Energy Storage Systems (BESS) are increasingly described as a cornerstone of modern energy infrastructure. However, many discussions still reduce BESS to a simple ...

According to BloombergNEF, global battery storage capacity doubled in 2023, and most of that growth came from lithium-ion ...

Here is a map of all utility-scale battery storage projects in the US. Hover over a battery storage project to view information on each project like their name, capacity and construction date.

In this Review, we describe BESTs being developed for grid-scale energy storage, including high-energy, aqueous, redox flow, high-temperature and gas batteries. Battery ...

Explore the top 25 BESS projects in the US and uncover the key players driving America's energy storage boom.

Browse past, present, and future energy storage projects from UC San Diego's Energy Storage Group. Filter by research area and see real-world impact in action.

Government Market News | Mary Scott Nabers Insights | Battery storage projects surge as utilities prepare for next grid era in 2026 | Battery storage projects nationwide are ...
