As a leading company in the bearing industry, we are committed to providing efficient, reliable and sustainable bearing solutions for solar power generation systems.

Solar technology company Conergy uses igus® components in their new solar tracking system. Learn more about how iglide® and drylin® are used here.

Let the light in with Mitrex Solar Glass -- a powerhouse in disguise, where photovoltaics meet limitless design, where color meets clarity. You're not just choosing glass; you're choosing a ...

Increase your solar panel efficiency by 40% with our advanced Solar Tracker Bearing. Maximize performance, ensure durability and reliability, and ...

Glass Flotation for PV and FPDs. For large-generation flat-panel displays and PV modules, it has become prevalent to float the glass ...

Increase your solar panel efficiency by 40% with our advanced Solar Tracker Bearing. Maximize performance, ensure durability and reliability, and experience seamless integration.

Let the light in with Mitrex Solar Glass -- a powerhouse in disguise, where photovoltaics meet limitless design, where color meets clarity. You're not ...

The glass type normally used for this technology is rolled low iron glass such as Sunplus(TM) Pilkington, often in toughened form, combined with an anti-reflective coating, to ensure that ...

The BERING Slim Solar Collection beats in time with nature! Because its energy source is environmentally friendly and infinitely available: Light! Not only sunlight, but any kind of light ...

New Way Air Bearings is no stranger to the flat panel display (FPD) sector, as well as the energy production sector as a whole. This is why we see immense potential for the application of our ...

As a leading company in the bearing industry, we are committed to providing efficient, reliable and sustainable bearing solutions ...

The key component that allows these systems to move is the solar tracker bearings. The materials required for these applications should have low-friction and be able to maintain ...
