## What is a solar curtain wall?

Commercial applications are most often designed, engineered, and installed by Solar as storefronts. The curtain wall can be utilized on virtually any type of business. A system can be added to the exterior of your building or utilized for interior divisions between departments or as office walls.

Are solar innovations &#174; curtain wall frames custom built?

All Solar Innovations &#174; curtain wall frames are custom built to meet the exact dimensions of your opening. Solar Innovations &#174; offers eight standard frame finish colors and unfinished aluminum; custom finish options are available at an additional cost.

What is a curtain wall system?

The Curtain Wall System is a thermally enhanced aluminum tubular glazing system for commercial and residential applications. Curtain walls are an excellent way to bring natural light into a room while remaining protected from the elements.

What is a photovoltaic curtain wall?

They enhance thermal comfort and help prevent the greenhouse effect. A standard curtain wall offers no return on investment. In contrast, a photovoltaic curtain wall not only insulates the building but also generates power for over 30 years. This reduces monthly electricity bills and ultimately pays for itself over time.

With Customizable Options, expert craftsmanship, and advanced thermal protection, ZhuZao is the ideal partner for commercial curtain wall projects that prioritize durability and visual impact.
