This paper introduces a novel testing environment that integrates unidirectional and bidirectional charging infrastructures into an existing hybrid energy storage system.

Hager Group develops and markets innovative solutions that allow electric vehicles to be used as storage for excess solar energy and feed this energy back into the ...

Hager Group develops and markets innovative solutions that allow electric vehicles to be used as storage for excess solar energy and ...

The objective of this article is to propose a photovoltaic (PV) power and energy storage system with bidirectional power flow control and hybrid charging strategies.

In the PV self-consumption optimization use case, EVs were used as home storage systems to store PV energy that is charged into the traction battery during the day and ...

We discuss different bidirectional Converter types, including AC-DC and DC-DC converters, to optimize power flow and voltage regulation. AC-DC converters rectify AC grid ...

By synthesizing these advancements, we propose a strategic direction for the advancement of integrated PV storage and charging solutions, paving the way for scalable and resilient energy ...

This paper introduces a novel testing environment that integrates unidirectional and bidirectional charging infrastructures into an ...

Our analysis highlights the feasibility, advantages, and challenges of implementing V2X in urban settings, underscoring its significant role in transitioning to a resilient, low-carbon ...

Bidirectional charging, such as Vehicle-to-Grid, is increasingly seen as a way to integrate the growing number

Bidirectional charging of smart photovoltaic energy storage containers for bridges in Estonia
