How long will a battery energy storage system last in Romania?

It is about to start building the BESS in Scornicesti in Olt county, west of Bucharest. R.Power is planning to complete it in a year. The battery energy storage system would have a duration of two hours, translating to 254 MWh in capacity. The project received funding from the National Recovery and Resilience Plan (NRRP or, in Romanian, PNRR).

Is battery energy storage a pillar of Romania's energy transition?

Recent updates about investments in battery energy storage systems (BESS) in Romania indicate the technology is becoming another pillar of the country's energy transition alongside wind power. For several years now, photovoltaics, and prosumers in particular - including municipal authorities, have dominated the scene.

Will Romania install a battery storage system on the Danube?

State-owned Hidroelectrica, the largest electricity producer in Romania, wants to install a battery storage system at Iron Gate 2 (Portile de Fier 2) on the Danube. Located on the border with Serbia, it is the second-largest hydroelectric plant in the country, at 252 MW in nominal capacity.

How much does Engie's battery storage project cost?

Economica.net learned that the battery storage facility would have 5 MW and a two-hour duration, costing the firm EUR 2 million. Engie's project was included in the reserve list last September after a public call for support to battery storage. The Ministry of Energy selected 13 applications for grants from NRRP.

The government has provided incentives both for households and utility-scale battery storage. Companies are combining batteries with solar and wind power as well as ...

The Ministry of Energy will allocate another 150 million euros for electricity storage batteries, as shown by a call for projects launched in public consultation.

The Romanian government, led by Prime Minister Marcel Ciolacu, has announced a EUR150 million fund for energy storage projects, open for applications until January 17, 2025. This initiative ...

The objective of the scheme is to support investments in the development of battery energy storage systems which can be used to ...
