Who can use our rentable battery storage containers?

Private individuals and businesses can use our rentable battery storage containers in any setting where they can physically be installed. Benefits include: Energy independence: break free from the grid and power your home or workplace with clean, reliable energy that you control.

Where can I rely on a containerised energy storage solution?

Today, we are also a name you can rely on for safe battery storage. Our containerised energy storage solutions are available as 10ft and 20ft high cubes and stand almost 3m tall, they can be deployed all over New Zealand and further afield (we have a footprint in 90+ countries).

Will we need 100 TWh of energy storage by 2050?

All over the world, the pace of renewable energy generation is growing exponentially. In the UK alone, 41% of all electricity now comes from renewable sources. While some of this is pumped straight into the grid for immediate use, the Royal Society predicts we will need 100 TWh of grid-scale energy storage by 2050.

How can containerised batteries help the transition to greener energy?

Renewable energy storage in containerised battery units is already playing a major role in our transition to greener energy. By ensuring that no energy generated by wind turbines, solar power or other eco-friendly means is lost, batteries help countries and organisations of all kinds to accelerate decarbonisation goals.

That's the reality portable energy storage solutions are creating across New Zealand. As demand grows for reliable off-grid power, companies like EK SOLAR are leading innovation in this ...

Energy storage developer Eku Energy has entered the New Zealand battery energy storage system (BESS) market. The developer ...

Build new generation or storage assets, recognising that renewables could be an expensive option, but the investment case for new gas turbines is currently difficult.

We've been solving storage challenges by delivering top-quality shipping containers to hundreds of Kiwi homes and businesses for years. With local branches in key locations throughout the ...

With 120kW of powerful output and 225kWh of massive capacity, our multi-layered safety system provides a
