-----

In July 2021 China announced plans to install over 30 GW of energy storage by 2025 (excluding pumped-storage hydropower), a more than three-fold increase on its installed ...

The chemical industry is adopting increasingly ambitious greenhouse gas emission targets. This work examines the decarbonization concept of a chemical site utility system ...

EPRI's Energy Storage & Distributed Generation team and its Member Advisors developed the Energy Storage Roadmap to guide ...

With chemical storage costs projected to hit \$70/kWh by 2030, we're approaching the magic threshold where storing wind and solar becomes cheaper than fossil fuel peaker ...

Small modular reactors are reshaping nuclear power with their compact design and potential, and other top energy stories from IEEE Spectrum in 2025.

According to BloombergNEF, global battery storage capacity doubled in 2023, and most of that growth came from lithium-ion technology. Companies like Tesla, LG Energy ...

EPRI's Energy Storage & Distributed Generation team and its Member Advisors developed the Energy Storage Roadmap to guide EPRI's efforts in advancing safe, reliable, ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record ...

According to BloombergNEF, global battery storage capacity doubled in 2023, and most of that growth came from lithium-ion ...

The U.S. energy storage market delivered a record-breaking quarter in Q3 2025, installing 5.3 GW nationwide and pushing year-to-date additions past the total installed ...
