-----

In less than three years, Chile has come close to hitting this target, with 1 GW of energy storage systems in operation, 571 MW in the testing phase for grid interconnection, ...

Storage project announcements are coming thick and fast as co-location with wind turbines offers cost efficiency and a smoother generation profile. Meanwhile, new capacity ...

The Punta Sierra pilot in Coquimbo marks an early step toward expanding storage solutions beyond Antofagasta. Chile's energy storage boom is driven by the need to optimize ...

In March 2024, Atlas Renewable Energy announced it has signed a power purchase agreement (PPA) with Chilean mining giant Codelco for the supply of 375 GWh of energy per ...

With transmission lines at overcapacity and permitting delays slowing the development of new grid infrastructure, battery energy storage systems (BESS) have surged ...

Chile has taken a significant step in the development of clean energy with the inauguration of the largest battery energy storage system (BESS) in Latin ...

Chile has taken a significant step in the development of clean energy with the inauguration of the largest battery energy storage system (BESS) in Latin America. This milestone marks a pivotal ...

Construction for the BESS facilities is ongoing and expected to be completed within a year. The projects benefit from wide geographic diversification and multiple ...

Chile has emerged as a world leader in hybrid systems and standalone energy storage since implementing its Renewable Energy Storage and Electromobility Act in 2022.

With transmission lines at overcapacity and permitting ...
