Why are lithium iron phosphate cathodes gaining popularity?

Lithium iron phosphate (LFP) cathodes are gaining popularity because of their safety features, long lifespan, and the availability of raw materials. Understanding the supply chain from mine to battery-grade precursors is critical for ensuring sustainable and scalable production.

Is LiFePO₄ a good battery cathode?

Although it has a lower energy density compared to other lithium-ion battery cathode materials, such as lithium cobalt oxide (LCO) or lithium nickel manganese cobalt oxide (NMC), LiFePO₄ offers consistent performance over a wide range of temperatures and conditions.

What is the market size of lithium iron phosphate (LFP) batteries?

By 2033, IMARC Group expects the market to reach USD 10.1 Million, at a projected CAGR of 5.32% during 2025-2033. The escalating demand for electric vehicles (EVs) is accelerating the demand for lithium iron phosphate, also known as lithium ferro-phosphate (LFP) batteries, due to their enhanced capability in terms of safety and lifecycle.

Why are lithium iron phosphate prices so high in South Korea?

During the first quarter of 2025, the lithium iron phosphate prices in South Korea reached 19200 USD/MT in March. Geopolitical tensions and disruptions in global supply chains affected the availability and cost of raw materials used in LFP battery production, impacting prices.

During the Council of Ministers meeting on October 16, the Ivorian government issued four decrees granting mining exploration permits: three for gold and one for lithium.

"This discovery demonstrates the geological potential of Cote d'Ivoire to become a key player in the global battery supply chain," an Atlantic Lithium spokesperson said.

Leveraging operational synergies with its activities in Ghana, Atlantic Lithium is applying its proven track record of lithium exploration, discovery and evaluation in tropical weathering ...

"These encouraging results mark an exciting milestone for Atlantic Lithium's exploration efforts in Cote d'Ivoire, where the company aims to discover Africa's next major ...
