What is a container ship facility in Aarhus?

The facility, designed specifically for container ships, will mark the first of its kind in Denmark and solidify the Port of Aarhus's commitment to green transformation. Under the agreement, Danish company PowerCon will supply the transformer station and power management system for the project.

Why is the port of Aarhus launching a shore power facility?

Anne Zachariassen, COO of the Port of Aarhus, emphasized the importance of the project "We are pleased that we can once again collaborate with PowerCon to establish a shore power facility. It will reduce both noise and local particle pollution caused by ships using diesel generators."

When will Aarhus' shore power project be operational?

The facility is expected to be operational by 2026, furthering the port's efforts to become a leader in sustainable port operations. The shore power project is part of the "OPS Network," a collaborative initiative involving key Northern European ports, including Aarhus, Gothenburg, Bremerhaven, and Stockholm.

Why is Denmark launching a green container ship facility?

This initiative represents a significant step forward in reducing emissions and enhancing sustainable port operations in Northern Europe. The facility, designed specifically for container ships, will mark the first of its kind in Denmark and solidify the Port of Aarhus's commitment to green transformation.
