---

As least 15 new battery energy storage systems slated for Staten Island, data shows Published: Jan. 05, 2026, 5:50 a.m.

Government Market News | Mary Scott Nabers Insights | Battery storage projects surge as utilities prepare for next grid era in 2026 | Battery storage projects nationwide are ...

There are many types of battery energy storage systems, including ones that can be installed at home to be used for on-site backup power, larger systems for business use, and even larger ...

To strengthen U.S. grid resilience and reduce exposure to supply chain risks, battery manufacturers, system integrators and project developers must seek out new and ...

NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. ...

A battery energy storage system (BESS), battery storage power station, battery energy grid storage (BEGS) or battery grid storage is a type of energy storage technology that uses a ...

There are many types of battery energy storage systems, including ones that can be installed at home to be used for on-site backup power, larger ...

We discover that lead-acid battery requires an additional 38.66 GW capacity of renewable energy sources than lithium-ion battery to achieve the zero carbon dioxide ...

In the age of decarbonization and distributed generation, the global energy landscape is undergoing a radical shift. At the heart of this transformation is the evolution of ...

Fears of massive battery fires spark local opposition to energy storage projects 1 of 6 | Facing growing electricity demands partly fueled by AI and warm weather, New York is beginning to ...

Energy storage technology is key to securing energy dominance and bolstering national security. Advances by this NSF Engine will be essential to ensuring that transition is ...
