What is a fire proof storage container?

Our fire proof storage containers are fully tested and certified as REI 120 in accordance with the current European standard EN 13501-2 and allow you to store flammable substances close to buildings or directly on the production floor.

What is a fire resistant container (FRC)?

Nordisk is a leading actor in the development of Fire Resistant Containers (FRC) for shipping of flammable and dangerous goods which could be lithium batteries, In the case of fire, the FRC container is able to handle over 700 degrees Celsius (1300 degrees Fahrenheit) and will suppress flames and contain an active fire for minimum 6 hours.

Do NIOS fireproof containers pass efectis fire tests?

DENIOS fireproof containers have passed Efectis fire tests in accordance with EN 13501-2. For more than 40 years, the accredited Efectis laboratory has been a recognised body for the testing and certification of fireproof products.

Why should you invest in a fireproof storage facility?

Investing in a fire proof storage facility means that hazardous substances can be stored close to production in the most convenient way. In the event of a fire, fireproof containers protect your raw materials for at least 120 minutes, giving the fire brigade time to respond.
