cite & em is HTML 5 - standard, which insists in meaning. For a long time, old HTML (like <i>) is used for layout display. But the new standard requires that HTML should ...

While and are of course more semantically correct, there seem definite legitimate reasons to use the and <i> tags for customer-written content.

For the Current Procedural Technology (CPT®) 2025 code set, a new Telemedicine Services subsection with 17 new codes has been added to the Evaluation and Management (E/M) ...

The "em" unit is equal to the computed value of the "font-size" property of the element on which it is used. The exception is when "em" occurs in the value of the "font-size" ...

While em is relative to the font-size of its direct or nearest parent, rem is only relative to the html (root) font-size. em gives the ability to control an area of a design. As in, scale the type in that ...

Make sure you understand the new coding requirements for postoperative services and transfers of care. The Office of Inspector General (OIG) recently Make sure you ...

Both of them emphasize text. The & lt;em& gt; tag shows text as italics, whereas & lt;strong& gt; makes it bold. Is this the only difference?

E/M coding standards and guidelines are based on the Current Procedural Terminology codes and used to document the type and severity of patient conditions.
