When will long duration energy storage be available in Ireland?

The Irish Electricity Storage Policy Framework, published after this data was collected, indicates that an immediate route to market for 500 MW of long duration energy storage is currently being developed, with further studies planned to support long duration storage from 2030 to 2040 (Government Of Ireland 2024a).

Is Ireland's energy sector undergoing a transformation?

Ireland's energy sector is undergoing a crucial transformation, with EirGrid's October 2025 consultation on the Long Duration Energy Storage (LDES) Procurement Mechanism marking an important milestone for storage developers and investors in this space.

What is Ireland's Electricity storage policy framework?

The policy framework is a first of kind policy, which clarifies the key role of electricity storage in Ireland's transition to an electricity-led system, supporting Ireland's 2030 climate targets, it may be considered as a steppingstone on Ireland's path to net zero carbon emissions.

Does energy storage need a new procurement framework?

A recent report by the storage industry representative organisation, Energy Storage Ireland, has emphasised the need for a new procurement framework for long duration energy storage in particular, and for co-ordinated strategy and stakeholder engagement with regulatory bodies, policymakers and industry (Energy Storage Ireland, 2022).

Ireland has officially launched a procurement scheme targeting Long Duration Energy Storage (LDES), a crucial step to enhance the country's renewable energy ...

Summary: Ireland's renewable energy transition demands robust energy storage solutions. This article explores procurement strategies, market trends, and practical insights for businesses ...

In line with this requirement and following detailed engagement with DCEE and the CRU, EirGrid is now consulting on a proposed procurement mechanism and operational ...

By participating in the Irish day-ahead energy market, energy storage can reduce day-ahead carbon emissions by 50% by using long-duration storage technologies. This makes a material ...

The consultation stems from the Government's Electricity Storage Policy Framework of 2024 which, following a Call for Evidence on long duration electricity storage ...

While the renewable energy industry urged the Government and grid operator to be more ambitious with the procurement mechanism to reach the original 500 MW target by 2030, ...

Using focus groups and a survey with the renewable energy and storage sector, we document perspectives on the critical barriers, innovative solutions and policy gaps identified ...

Ireland's energy sector is undergoing a crucial transformation, with EirGrid's October 2025 consultation on the Long Duration Energy Storage (LDES) Procurement Mechanism marking ...

The Electricity Storage Policy Framework presents 10 government actions to support the role of electricity storage systems in Ireland's energy transition, identifying the key ...

Ireland's transmission system operator (TSO) Eirgrid has launched a consultation on a proposed procurement mechanism and operational considerations for its long-duration ...
