The safe and reliable installation of photovoltaic (PV) solar energy systems and their integration with the nation's electric grid requires timely ...

The categorical exclusions contemplated in the NOPR are intended to speed up project development and reduce the time and ...

DOE proposes to establish a new categorical exclusion for certain energy storage systems and to revise existing categorical exclusions for upgrading and rebuilding ...

Rulemaking to add a CX for certain energy storage systems, revise CXs for upgrading and rebuilding transmission lines and for solar PV systems, and make conforming ...

The safe and reliable installation of photovoltaic (PV) solar energy systems and their integration with the nation's electric grid requires timely development of the foundational codes and ...

DOE is simplifying the environmental review process for certain energy storage systems such as battery systems, transmission line upgrades, and solar photovoltaic systems.

These exemptions would help certain solar energy projects avoid significant public disclosure and delay. On November 16, 2023, the U.S Department of Energy ("DOE") issued a ...

In November, 2023, the Department of Energy proposed to offer "categorical exclusions" from otherwise required environmental reviews for certain energy storage, solar ...
