China is rapidly scaling up its solar and wind energy infrastructure, accounting for nearly three-quarters of all utility-scale projects currently under construction worldwide, ...

China is rapidly scaling up its solar and wind energy infrastructure, accounting for nearly three-quarters of all utility-scale ...

It is China's first large-scale integrated energy base transmission project combining wind, solar, coal, and energy storage.

China's first "wind-solar-thermal-storage integration" ultra-high voltage (UHV) project, the Longdong-Shandong 177,800 kilovolt direct current (DC) transmission project, was ...

This is the world's first smart zero carbon container terminal, which incorporates a distributed photovoltaic system across 16,000 square meters of rooftop and installs two wind ...

China's first "wind-solar-thermal-storage integration" ultra-high voltage (UHV) project, the Longdong-Shandong 177,800 kilovolt direct ...

Recently, China's first grid-forming wind-solar-storage integrated system applied in substations for real-time power supply assurance -- the Houhai No. 3 (Chunhui Substation) ...

In Q1 2025, China's wind and solar capacity surpassed its thermal (coal and gas) capacity for the first time, supplying nearly 23% of the country's total electricity consumed, up from roughly ...

Under the goal of "Carbon Emission Peak and Carbon Neutralization", the integrated development between various industries and renewable energy (photovoltaic, wind power) is ...

China is advancing a nearly 1.3 terawatt (TW) pipeline of utility-scale solar and wind capacity, leading the

global effort in renewable energy buildout. This is in addition to China's already ...

In CY2024, China hit a new record of annual net new capacity added to the grid at 429GW, a 21% y-o-y increase. Of this, wind and solar power combined capacity accounted for 83% at ...

This review further proposes a strategic roadmap for sustainable development, emphasizing the integrated deployment of wind and solar as the dominant sources of power generation.
