Will ECOWAS build a solar power station in Gambia?

In October 2022, a meeting was convened in Banjul, Gambia's capital city, in which representatives of the member countries of ECOWAS validated the feasibility study for the construction of the 150 MW Soma Solar Power Station, in Soma, Gambia.

Will the Gambia build a solar farm in Soma?

The Gambia will build a 150 MW solar farm near the planned 250kV/30kV substation in Soma, to either upload power to stabilize the Gambian grid or for injection into the West African Power Pool or both, depending on conditions.

How many megawatts does Gambia generate?

As of January 2019, Gambia had total installed generating capacity of approximately 139 megawatts. Of this, the Gambia National Water and Electricity Company (NAWEC), generated 102 megawatts and an independent power producer generated approximately 26 megawatts, at Brikama, an urban centre, south of Banjul.

How many substations will be built in Gambia?

A total of 15 substations will be built in the region, stepping down power from 225kV to 30kV for eventual distribution to homes, businesses and industry. One of those substations is under development in the town of Soma, Gambia.

The Gambia currently has an installed power generation capacity of over 100 MW, yet only generates around 40 MW and faces demand exceeding 50 MW. To address this, the ...

On Saturday, at a historic occasion in the Community of Kombo Jambur, President Barrow led the official inauguration ceremony ...

On completion, the plant would not only be Gambia's first utility-scale IPP but is also planned to be the foundation for a major West African Power Pool-focused second phase.

mix of fossil fuels. In countries and years where no fossil fuel generation occurs, an average fossil fuel emission factor has been used to calculate countries and areas. The IRENA statistics ...
