What is a base battery system?

The Base battery system is built for performance and reliability. It combines a high-capacity lithium iron battery with intelligent software to optimize energy use. The Base battery system has three main components: the battery pack, inverter, and hub. The long white unit is the battery pack. We mount the battery pack on the ground.

What is a whole-house battery backup system?

A whole-house battery backup system is the ultimate solution for home energy security. It provides automatic, reliable power during outages without noise, fumes, or fuel dependency. If you're considering a more innovative, cleaner backup energy solution, this guide covers everything you need to know. Part 1. What is a house battery backup system?

What is a Generac home standby generator?

Adding a Generac home standby generator up to 28 kW provides the ultimate peace of mind and energy independence with virtually endless\* backup capabilities. Generac provides US-based support for homeowners to assist with troubleshooting. We've been keeping the lights on since 1959, making us one of the leading home energy experts in the industry.

How does a whole house battery backup system work?

A whole house battery backup system operates by charging itself from the grid or solar panels when electricity is available. It monitors the status of the power supply continuously. As soon as an outage is detected, the system activates and redirects stored energy into your home's electrical circuits.
