## How long do solar lights last?

The longevity of solar lights can range from 6 months to 2 years based on the type of battery used. Understanding the impact of battery technology on solar lights is important for ensuring their durability. Making an informed decision when it comes to battery type can greatly affect how long solar lights last and how well they operate.

### How long do lights last?

The batteries in a Mason Jar Solar Lamp usually last 3 to 5 years. They are rechargeable batteries, so if they become weak, simply recharge them. (Original comment: 'Have left lights up like this for years and batteries usually last 3 to 5 years, they are rechargeable batteries so if they get weak just recharge.')

### How long do solar-powered outdoor landscaping spotlights last?

If you're looking to light up your garden (and we mean really light it up) we recommend these solar-powered outdoor landscaping spotlights. They're designed to run for 6 hours or more, according to the manufacturer, plus they're waterproof and come with a 10-year limited warranty attached.

### How long do solar path lights last?

If you're all about sleek, modern design, these solar path lights are right up your alley. With 10 bulbs per light and a motion sensor, you can rest assured that your dark pathway will be illuminated when it matters the most. On a single charge, the lights will last for 8-10 hours with 150 activations of the motion sensor. Find it at Wayfair
