Why is the North Korean leader's Green train so important?

The North Korean leader's olive green train is equipped with attack weapons and a helicopter for escape. Why is the Putin-Kim meeting important? A luxurious yet battle-ready massive green train has rolled across North Korea's border into Russia carrying leader Kim Jong Un to a meeting with President Vladimir Putin.

How fast can a train go in North Korea?

The train can reach speeds up to 80 kph (50 mph) on China's network, compared with a maximum of about 45 kph (28 mph) on North Korea's tracks, Ahn said. WHO USES THE TRAINS? North Korea's founding leader, Kim Il Sung, Kim's grandfather, travelled abroad by train regularly during his rule until his death in 1994.

Why did Kim Jong un take a train to North Korea?

The train has been at the centre of state propaganda around the ruling Kim family's embarking on long train journeys to meet ordinary North Koreans across the country. In 2022, state television showed Kim Jong Un taking what it termed an "exhaustive train tour" around North Korea to inspect corn crops and promote a "communist utopia".

Will North Korea get a faster Internet?

Therefore, one can expect North Korea to inch forward with internet development, but always on its own terms. The average North Korean in five years may have a faster phone and more digital tools - yet still will be largely cut off from the World Wide Web, surfing a state-run network under the watchful eyes of the government.
