Where can I find data on power plants?

Data is included for all power plants that were operating from 2018 through 2023. See the map link below for more information on sources and notes. Access the map here. Synapse has developed a free-to-use interactive map of power plants in the United States using data from the U.S. Environmental Protection Agency.

Which California power stations have 10 megawatts?

This is a list of operational biomass and biogas power stations in California with a nameplate capacity of at least 10 megawatts. The Argus Cogeneration Plant in San Bernardino County is the only coal-fired power station still operating within the state of California.

Are there any pumped-storage power stations in California?

This is a list of all operational pumped-storage power stations in California. This is a list of operational natural gas-fired power stations in California with a nameplate capacity of at least 100 megawatts.

Where can I find a power plant map?

Access the map here. Synapse has developed a free-to-use interactive map of power plants in the United States using data from the U.S. Environmental Protection Agency. This map displays information on location, fuel type, electric generation, generating capacity, ownership, and emissions for over 10,000 power plants across the country.

Storage systems have capacities reported as low as five kilowatts, and some totals are reported to the nearest megawatt. This might cause some small rounding errors. Utility data on ...

Data is included for all power plants that were operating from 2018 through 2023. See the map link below for more information on sources and notes.

This is a list of power stations in the U.S. state of California that are used for utility-scale electricity generation. This includes baseload, peaking, and energy storage power stations, but does not ...

SACRAMENTO -- New data show California is surging forward with the buildout of battery energy storage systems with more ...

Following is a list of Power Plants Listed in alphabetical order. Please use the filters on sidebar to refine the

list based on technology used by the power plant and the status of the project.

Following is a list of Power Plants Listed in alphabetical order. Please use the filters on sidebar to refine the list based on technology used by the power ...

**SACRAMENTO** -- New data show California is surging forward with the buildout of battery energy storage systems with more than 6,600 megawatts (MW) online, enough ...

This is a list of power stations in the U.S. state of California that are used for utility-scale electricity generation. This includes baseload, peaking, and energy storage power stations, but does not include large backup generators. As of 2018, California had 80 GW of installed generation capacity encompassing more than 1,500 power plants; with 41 GW of natural gas, 26.5 GW of renewable (12 G...

Figures are based on October 2025 generation numbers. Browse our directory of all the power plants across California. View monthly power plant generation and fuel consumption, power ...

Energy storage resources have become an increasingly important component of the energy mix as traditional fossil fuel baseload energy resources transition to renewable energy ...

**Energy Storage:** As California increases its share of renewable energy, investments in energy storage technologies are essential to managing the intermittency of wind and solar power.

The power plant locations and characteristics are part of the California Energy Commission's (CEC) California Energy Infrastructure geospatial data sets. The data is derived from the ...
