Why is the Green telecom movement gaining traction in India?

The green telecom movement is gaining traction in India and other countries due to several factors. First, increased global awareness of climate change and its potential consequences puts pressure on businesses and industries, including the telecom sector, to adopt sustainable practices and reduce carbon emissions.

How can telecom companies make data center operations more sustainable?

Telecom industries are constantly looking for methods to make their data center operations more sustainable and energy efficient. This entails using renewable energy sources like solar and wind power in addition to adopting energy-efficient technologies like server virtualization and data center consolidation into operation.

How telecommunications sector should be green?

TRAI in its recommendation on approach towards green telecommunications has recommended to initiate measures to green the telecommunication sector, all Infrastructure and services in the Telecom Sector should be Energy and performance assessed. The same is being examined. TRAI recommendations are available on their website.

How can the telecom industry contribute to a sustainable and eco-friendly future?

By adopting green information and communication technology (ICT), investing in renewable energy sources, improving energy efficiency and fostering responsible waste management, the telecom industry can contribute to building a sustainable and eco-friendly future while maintaining its position as a critical and essential sector of the economy.

In a ground-breaking move towards sustainability, PSA Mumbai container terminal has partnered with O2 Power to commission a 7.8 MW solar farm, marking India's first fully ...

In early 2024, PSA Mumbai plans to introduce e-trucks through PSA BDP India, creating a zero-emission green transport corridor in ...

As on 30-06-2023, solar projects of capacity of 70.10 GW have been commissioned in the country. The capacity of 70.10 GW includes 57.22 GW from ground-mounted solar ...
