How much does a solar battery storage system cost?

Most solar battery storage systems cost \$10,000 on average, with most ranging between \$6,000 and \$12,000. Prices range from \$400 for small units to over \$20,000 for larger systems. Key cost factors include battery type, capacity, installation labor, and additional equipment.

How much does it cost to install a solar battery?

A report from the National Renewable Energy Laboratory (NREL) estimates that a solar battery including installation can cost almost \$19,000\* to install, including the price of the battery itself and labor. Installation and permitting fees vary by location and installer, but the NREL estimates the battery itself typically costs \$16,007.

How much does a solar battery cost in 2025?

While prices for solar batteries in 2025 range widely from around \$7,000 to \$15,000 installed, the long-term benefits can outweigh the initial expense. A battery allows you to store excess solar energy for nighttime use, reduce your reliance on the grid, and maintain power during outages.

How much does a battery system cost?

Battery systems can range from 5 to 40 kWh, depending on your energy needs. Battery prices also vary by brand, capabilities, and installation factors. We'll explore these factors later. On average, it costs around \$1,300 per kWh to install a battery before incentives. With the 30% federal tax credit applied, the cost is closer to \$1,000 per kWh.
