How much does it cost to build a 20ft container home?

For a basic 20ft container home with standard finishes, expect material costs around \$18,000-20,000 and labor costs around \$15,000-22,500. A 40ft container typically doubles these amounts. High-end builds with custom features can reach \$35,000 in materials for a 20ft container and \$55,000 for a 40ft container, with labor adding \$22,500-45,000.

How long does it take to build a shipping container home?

A contractor can install your shipping container home in as little as 90 days. This is notably quick compared to a traditional home build, which can take more than a year (providing there aren't permitting or construction delays that make the wait even longer). For the quickest installation, choose a prefab container home.

How much does it cost to insulate a shipping container?

Framing and insulation are key to keeping your home at a good temperature. Proper insulation helps prevent the inside from getting too hot or too cold. Framing: Framing is generally priced at \$18 to \$24 per linear foot. Insulation: To insulate a shipping container, you will pay from \$0.80 to \$4.50 per square foot, depending on the material used.

What do you need to build a shipping container home?

Like any other home you build, you'll need to install electrical, plumbing, heating and cooling, insulation, and drywall in order to make your shipping container home a functional living space. You will also need a roof on top of the home to withstand the elements. Here are some common finishing expenses.
