-----

Grounding your base station antenna requires some reading on both relevant regulations and some of the underlying physics. These principles apply to both Citizens Band (CB) and High ...

Placing an 8? ground rod into the ground directly below the antenna is recommended for a base station. Then, run a #8 solid copper ground wire from the U-Clamp, attaching the antenna to ...

Connect the grounding wire directly to the tower base or the anchor bolts using a clamp. This step ensures that the tower itself is part of the ...

Grounding your base station antenna requires some reading on both relevant regulations and some of the underlying physics. These principles apply to ...

Connect the grounding wire directly to the tower base or the anchor bolts using a clamp. This step ensures that the tower itself is part of the grounding system and offers a direct path for ...

There are 5 general locations where you can bond to ground an antenna mast, coax cable, or other conductor required to be bonded to ground before entering a structure.

IntroductionQuotesFunctionsSafetyResourcesExamplesAdvantagesAfter antennas, station grounding is probably the most discussed subject in amateur radio and it is also the one replete with the most misconceptions. The first thing to know is that there are three functions served by grounding in ham shacks: 1. Electrical Safety 2. Stray RF Suppression (or simply RF Grounding) 3. Lightning Protection. Each has it...See more on arrl CB World InformerProper Base Station & Mobile GroundingPlacing an 8? ground rod into the ground directly below the antenna is recommended for a base station. Then, run a #8 solid copper ground wire ...

**EVERYTHING IN THE STATION IS AN ANTENNA!** A single, solid ground system made of short, heavy, direct connections can satisfy all of the requirements for... Block, R. R., The "Grounds" ...
