Is battery storage a key technology for Mozambique's future?

Globeleq sees battery storage as a key technology for Mozambique's future. Storage costs are expected to continue decreasing, so those systems will become more competitive and will be able to contribute more.

When did Globeleq & Mozambique launch a solar power plant?

Our solar power plant in Cuamba was inaugurated in September of 2023. It marked another milestone for Globeleq and Mozambique, as it was the first IPP to integrate a utility-scale energy storage system.

Why should Mozambique be a regional power supplier?

First, to ensure that Mozambique has reliable and cost-effective power generation capable of meeting its 2030 electrification goals. Second, to establish Mozambique as a regional power supplier of choice. South Africa has a critical shortage of electricity, and Zambia and Zimbabwe also require power.

Should Mozambique export electricity?

One of the big challenges of Mozambique is its size and shape, which make the transportation of electrons across the country quite expensive. Exporting electricity would bring foreign currency that can support investments in domestic transmission and distribution infrastructure.

Summary: Mozambique has launched a groundbreaking photovoltaic energy storage project to address energy shortages and accelerate its renewable energy transition. This article explores ...

Huawei's FusionSolar Smart String Energy Storage Solution will power the Red Sea City's off-grid, clean energy needs. The Red Sea Project, a key part of SaudiVision2030, is now the ...

Lahore, Pakistan - March 24, 2025 - In a landmark move towards advancing sustainable energy solutions in Pakistan, Huawei and AE Power have officially entered into a strategic partnership ...

This project, selected through an international tender with six proposals, will be the largest energy storage system in Central America once operational by the end of 2025.

Let's cut to the chase--Mozambique's latest joint energy storage project bidding isn't just another infrastructure tender. With global energy storage now a \$33 billion industry ...

Huawei builds another energy storage project. The project, considered the world's largest solar-storage project, will install 3.5GW of solar photovoltaic capacity and a 4.5GWh battery storage ...

Mozambique is part of a group of over 30 African countries whose electricity companies are adopting Huawei's technological solutions. In total, the Chinese multinational ...

Mozambican regulator Autoridade Reguladora de Energia (Arene) has issued a request for proposals (RfP) for independent power producers (IPPs) to develop and install solar PV and ...

Samir Sal&#233;, country and business development director of Globeleq, talks to The Energy Year about fast-tracking renewables ...

Samir Sal&#233;, country and business development director of Globeleq, talks to The Energy Year about fast-tracking renewables projects in Mozambique and the potential of solar ...
