? Complete Solar Integration by Kabul Solar ?? Thrilled to unveil one of our latest commercial-scale achievements: a 15kW grid-independent PV system engineered for high performance ...

Zularistan operates from its Main Office located in Kabul as well as 2 regional offices in Kandahar and Jalalabad. Zularistan started operations in ...

Groups opposed to the Kabul government might target energy infrastructure to disrupt services and erode the Taliban's legitimacy. Protecting these assets will necessitate ...

Zularistan operates from its Main Office located in Kabul as well as 2 regional offices in Kandahar and Jalalabad. Zularistan started operations in Afghanistan in partnership with a German ...

Involving a mix of solar, lead battery storage and diesel backup, the renewable energy project provides sustainable and cost-effective electricity to local people. Prior to installation, residents ...

OverviewExternal linksHydroelectricityImported electricityCrude oil, natural gas, and coalSolar and wind farmsBiomass and biogasGeothermalAn area of vast untapped potential lies in the heat energy locked inside the earth in the form of magma or dry, hot rocks. Geothermal energy for electricity generation has been used worldwide for nearly 100 years. The technology currently exists to provide low-cost electricity from Afghanistan's geothermal resources, which are located in the main axis areas of the Hindu Kush. These run along the Herat fault system, all the way from Herat to the Wakhan District of Badakhshan Province in ...
