Emerging markets in Africa and Latin America are adopting industrial storage solutions for peak shaving and backup power, with typical payback periods of 2-4 years.

GRIPS introduced a smart storage system that seamlessly switches between grid, battery, and solar power during outages, promising more dependable energy. This move ...

Take Nepal's first solar-storage PPA signed last week - a 25-year deal guaranteeing 14% IRR through monsoon/winter price arbitrage. As Asian Development Bank's energy lead Priya ...

GRIPS introduced a smart storage system that seamlessly switches between grid, battery, and solar power during outages, ...

Photovoltaic hybrid systems offer Kathmandu a path to energy independence while supporting Nepal's 2025 Renewable Energy Vision. As technology advances and costs decline, these ...

In recent months, Kathmandu's photovoltaic (PV) module exports have seen a significant downgrade in international markets. This shift stems from two main factors: tightening global ...

Imagine a city where streetlights dim during peak hours while hospitals rely on diesel generators. This isn't fiction - Kathmandu's power demand grew 18% annually since 2020, yet 6-hour daily ...

Kathmandu's unique combination of high solar irradiance (4.5-5.5 kWh/m²/day) and mountainous terrain creates both challenges and opportunities for solar manufacturers.

SunContainer Innovations - Imagine a city where streetlights dim during peak hours while hospitals rely on diesel generators. This isn't fiction - Kathmandu's power demand grew 18% ...

This groundbreaking project will replace polluting diesel generators with a large-scale battery storage system powered by solar energy.
