The project aims to enhance energy supply security and mitigate risks of outages, while also facilitating the integration of ...

Our 1 GW project combines gas, solar, and battery storage to secure Kyiv's grid, cut emissions, and support critical services. Explore investment in this high-impact initiative.

The project aims to enhance energy supply security and mitigate risks of outages, while also facilitating the integration of renewable energy sources into Ukraine's national grid.

The combined facilities, which were constructed in partnership with U.S.-based Fluence, a global leader delivering intelligent energy storage, have the capacity to store 400 ...

Construction of the project was completed in just six months - significantly faster than the industry average for projects of similar scale and complexity. The accelerated timeline ...

Total investment in the project by DTEK amounts to EUR125 million. The energy storage systems will provide Ukraine's power grid with a higher level of resilience and stability, while also ...

DTEK has secured a \$72m loan to construct what has been described as one of the largest battery energy storage (BESS) facilities in Eastern Europe. The funding will be ...

Construction of the project was completed in just six months - significantly faster than the industry average for projects of similar scale ...

Ukrainian private utility DTEK has energised the largest battery storage project in the war-torn country and one of the biggest ones in Eastern Europe. The 200 MW/400 MWh installation ...

The project was developed in partnership with American energy company Fluence Energy Inc. The 200-megawatt system spans six locations across Ukraine and represents one ...
