Government Market News | Mary Scott Nabers Insights | Battery storage projects surge as utilities prepare for next grid era in 2026 | Battery storage projects nationwide are ...

More and more, big arrays of lithium-ion batteries are being hooked up to electrical grids around the U.S. to store power that can be discharged in times of high demand.

People living in some neighborhoods are now worried about what could happen with hundreds of lithium-ion batteries that are being stored in metal containers near their ...

Calibrant has energized three front-of-the-meter battery energy storage systems in Westchester County, New York, with a combined capacity of 13.5 MW / 55.7 MWh.

Electrical Energy Storage (EES) systems store electricity and convert it back to electrical energy when needed. 1 Batteries are one of the most common forms of electrical energy storage.

The state of New York announced its first bulk energy storage solicitation on Monday, issuing a request for proposals to procure a total of 1 GW from storage developers as ...

NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. ...

Energy storage systems, like large-scale batteries, are charged by electricity drawn from the power grid during periods of low demand or extra capacity, provided they are not directly ...

Energy storage systems, like large-scale batteries, are charged by electricity drawn from the power grid during periods of low demand or extra ...

As least 15 new battery energy storage systems slated for Staten Island, data shows Published: Jan. 05, 2026, 5:50 a.m.

World's largest vanadium flow battery goes online in China with 1 GW solar plant The record-breaking battery will boost renewable energy use by over 230 million kWh a year.
