Will stellantis build a lithium phosphate battery plant in Spain?

Stellantis and CATL have announced plans to jointly build a 4.1 billion euro (\$4.3 billion) lithium iron phosphate battery plant in Spain.

Where is the new lithium phosphate factory located?

The factory, with an investment of EUR285 million and occupying approximately 25 acres, will be located close to a planned battery plant in the region. It is set to become the first factory in Spain's Catalonia region to produce lithium iron phosphate (LFP) materials. Dynanonic and ICL will hold 20% and 80% stakes in the factory, respectively.

Where will dynanonic's lithium battery materials factory be located?

According to ICC, recently, Dynanonic reached an agreement with specialty minerals company ICL Group to jointly establish a lithium battery materials factory in Sallent, Catalonia, Spain. The factory, with an investment of EUR285 million and occupying approximately 25 acres, will be located close to a planned battery plant in the region.

What is a lithium iron phosphate (LFP) plant?

A joint venture between the Israeli firm ICL Group and China's Shenzhen Dynanonic plans to build a \$297 million lithium iron phosphate (LFP) plant in Spain. LFP is a cheap cathode material for batteries. ICL has also been planning an LFP plant in Missouri. That plant will use technology from the Taiwanese firm Aleees.

BARCELONA, Spain (AP) -- Chinese electric battery company CATL and automaker Stellantis will build a major battery factory in northern Spain, the partners ...

ICL is pleased to repurpose this location and to revitalize the roughly 25 acres of available land, as it takes leadership in bringing mass production of LFP to the EU via Spain.

ICL, a global specialty minerals company, today announced it has signed a joint venture agreement with Shenzhen Dynanonic Co., Ltd. ...

The strategic location near the Port of Barcelona and rail connections to France will facilitate efficient distribution across Europe, meeting the growing demand for lithium-ion ...
