Highview's liquid air energy storage system captures excess renewable energy when demand is low, and stores it as liquid air, for ...

This site is the first in our planned program of energy storage plants across the UK, and we expect the first phase to be up and running by the second half of next year.

Highview's liquid air energy storage system captures excess renewable energy during periods of low demand, storing it as liquid air for hours, days, or weeks. When required, ...

The funding, led by the UK Infrastructure Bank (UKIB) and Centrica, will support the construction of one of the world's largest long-duration energy storage facilities in ...

The funding will enable Highview to launch construction on a 50MW/300MWh long-duration energy storage (LDES) project in Carrington, Manchester, using its proprietary liquid ...

Work has begun on a £300m energy plant which will store surplus electricity from wind and solar farms in the form of liquid air. The ...

Construction at the site in Carrington, Manchester, will begin immediately, according to Highview Power. The commercial-scale LAES is expected to have an output ...

Highview Power has announced a significant £300 million funding boost for constructing the UK's first commercial-scale liquid air energy storage (LAES) facility in ...

Highview's liquid air energy storage system captures excess renewable energy during periods of low demand, storing it as liquid air for ...

An engineering-led collaboration between Sulzer and Highview Power will help provide long-duration energy storage at Highview Power's new facility at Carrington, ...
