Depuis 2020, la Ville de Marseille s'engage en faveur du "mieux-vivre ensemble", avec une transformation ambitieuse pour répondre aux besoins de toutes et tous, dans tous les ...

These innovations aim to improve energy efficiency, reduce size, and increase the payload capacity of drones, making them more viable for long-endurance missions.

In order for electrical energy to be used efficiently, it must be stored. This article reviews energy storage technologies used in aviation, specifically for micro/mini Unmanned ...

Directed at the special application background of the unmanned aerial vehicle (UAV), this study designs and optimizes the UAV power supply system based on photovoltaic (PV)-energy ...

Stade président de l'Olympique de Marseille, l'Orange Velodrome de Marseille a aussi vocation d'accueillir ponctuellement des grandes rencontres internationales (football, rugby), des ...

This study fills a critical gap by providing a holistic analysis of renewable energy integration in UAVs and proposing innovative approaches to optimize endurance, efficiency, ...

Après avoir décidé de l'accès gratuit pour toutes et tous aux collections permanentes des Musées de Marseille, elle propose un panel d'expositions riche et varié; ...

We study, design, and fabricate the first battery-free fixed-wing UAV that is powered completely by harvested energy to perform its sensing, computing, and flying tasks ...

Researchers from Spain and Ecuador have developed an optimization method to integrate PV cells and batteries into UAVs. They ...

Energy system model for solar-powered unmanned aerial vehicle Fig. 1 (a) and (b) show the typical energy
