---

As the sun dips below the Kalahari dunes each evening, this lithium-ion and flow battery hybrid system kicks into gear, storing enough daytime solar energy to power 90,000 ...

In Namibia, one of the largest electricity storage systems in southern Africa is currently being built - financed with a grant from KfW. Namibia has great potential for solar and wind energy, but ...

In December 2023, the country signed contracts for its first utility-scale battery energy storage system (BESS) - a 54MW/54MWh project at Omburu Substation [1] [2]. But why should the ...

The Omburu BESS Project will be developed, owned, and operated by NamPower, where NamPower will appoint an EPC contractor to construct the BESS. The KfW Development Bank ...

This groundbreaking initiative marks the country's first utility-scale battery installation and is crucial for strengthening the national electricity grid and supporting the ...

The project features a 45 MW / 90 MWh BESS facility, representing the country's largest battery, and is part of the broader Transmission Expansion and Energy Storage ...

The project is expected to be completed and commissioned in the second quarter of 2026, according to the statement. A press release from SDEE said the project will "enable" ...

Namibia has reached a major milestone in its renewable energy journey with the arrival of the first shipment for the Omburu Battery Energy Storage System (BESS) Project, ...

The project features a 45 MW / 90 MWh BESS facility, representing the country's largest battery, and is part of the broader ...

Namibia is not yet self-sufficient, but the combination of grid-scale storage and transmission expansion is laying the foundation for a more resilient and renewable-driven ...

In light of this situation, KfW offered to finance a Battery Energy Storage System (BESS) project to support the power grid. In this context, we ...

In light of this situation, KfW offered to finance a Battery Energy Storage System (BESS) project to support the power grid. In this context, we conducted a detailed feasibility study to identify the ...
