Why has Nanya Technology paused price quotes?

With leading memory makers like Samsung and Micron winding down DDR4 production and prices surging, Taiwan's major supplier Nanya Technology has reportedly paused price quotes, signaling tightening supply and growing demand, according to Economic Daily News.

How did Nanya perform in the third quarter of 2025?

Memory manufacturer Nanya successfully ended 11 consecutive quarters of losses in the third quarter of 2025. General manager Pei-Ing Lee stated that average selling prices (ASPs) rose about 40% quarter-over-quarter in the third quarter, with strong confidence in continued price increases and operational growth in the fourth quarter.

Which companies dominate the supercapacitors market?

The supercapacitors market exhibits moderate concentration. Maxwell Technologies (Tesla), Skeleton Technologies, and Eaton command core patents and automated factories that lower per-cell costs.

Why do supercapacitors need a system supplier?

System suppliers integrate algorithms that shift power between supercapacitors and batteries to match route topography, which lowers total cost of ownership. As electric-bus procurements rise, this capability strengthens the competitive position of the supercapacitors market in mass-transit electrification.

Last week, Taiwan's top DRAM maker Nanya Technology reportedly halted DDR4 spot price quotes amid soaring prices.

Supercapacitors (or ultracapacitors) utilize high surface area electrode materials and thin electrolytic dielectrics to achieve high capacitance values. They have more capacitance ...

The company expects contract price improvements and inventory normalization to support near-term performance, though achieving sustainable profitability remains uncertain.

Although price hikes vary across product lines, maintaining first-quarter 2026 pricing would be ideal. Recently, customers have also requested annual long-term contracts ...
