---

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record ...

New York Gov. Kathy Hochul has launched New York's first bulk energy storage request for proposals (RFP), intended to procure 1 GW of bulk energy storage as part of New ...

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, ...

Adding bulk energy storage to New York's grid will lower costs, optimize the generation and transmission of power, enhance energy grid infrastructure, and ensure the ...

As shown to the right, the five-year outlook for the U.S. energy storage market projects sustained growth. According to projections, total installed energy storage capacity is ...

Explore the Future of energy storage--discover key technologies, market trends, and innovations powering the clean-energy transition.

Governor Kathy Hochul has unveiled New York's first competitive solicitation for bulk energy storage, aiming to procure 1 gigawatt (GW) of capacity as part of the state's ...

Explore the biggest renewable energy innovations 2025--from AI grids and long-duration storage to green hydrogen and smart buildings.

US energy storage set a Q1 record in 2025 with 2 GW added, but looming policy changes could put that growth at serious risk.

Utilities frequently propose new storage deployments, even in states and regions where legislative mandates are not in place, noting that the services that energy storage can ...
