What did NZEC announce about the Tariki project?

New Zealand Energy Corp. (NZEC) announced a significant update on its Tariki project, including positive results from the Tariki-5A well and the accelerated development of a gas storage facility on February 11.

Are EPC contracts available in New Zealand?

EPC contracts are commonly used overseas (including in Australia). However, until recently, they have not been as frequently or commonly used in New Zealand, and there is currently no New Zealand standard form EPC contract available for use by renewable energy developers.

Why is NZEC accelerating its gas storage project for 2025?

Photo: Shutterstock NZEC confirms reserves at Tariki-5A and accelerates its gas storage project for 2025 in the face of growing demand in New Zealand.

How will New Zealand transition to net zero emissions?

As New Zealand continues towards electrification of its energy system to assist the transition to net zero emissions, more renewable energy projects are starting to move through the development phases and are reaching the start of construction.

Looking ahead post achieving RTB, NZ Clean Energy (NZCE) plans to launch a formal Engineering, Procurement and Construction tender process, and finalise equipment suppliers.

This article explains the commonly adopted approaches to contracting for the construction of renewable energy projects in New Zealand and looks at some key issues our ...

What types of Renewable Energy does the New Zealand government procure? Procurements include generation systems, storage, and services to support low-carbon infrastructure.

Planning, procurement of long lead items, and contracting of the workover unit and personnel are well advanced, with commitments expected by the second week of February 2025.

NZEC has commenced recruiting additional personnel to expand its gas-storage development capabilities and support execution and delivery of the Tariki Gas Storage Project.
