---

India's power sector is undergoing a structural shift as the country advances toward its target of 500 GW of clean energy capacity by 2030. The increasing integration of solar and ...

In this blog, we explore the top 7 biggest battery energy storage projects in India in 2025, highlighting their capacities, technologies, and strategic importance in supporting grid stability ...

India's Battery Energy Storage Systems (BESS) sector witnessed notable developments in July 2025, marked by key policy advancements, project awards, and the ...

capital expenditure (CAPEX) support for 4 GWh BESS projects from 2023-24 to 2025-26. As of January 2025, a total of 118 GWh of energy storage tenders have been floated in India, ...

In this blog, we explore the top 7 biggest battery energy storage projects in India in 2025, highlighting their capacities, technologies, and strategic ...

With a significant increase in renewable energy generation capacity, it is imperative that storage facilities are developed to help India ...

As a strategic growth market for ENGIE, the Group aims to increase its installed renewable energy and storage capacity in India to 7 ...

SBICAPS said in a new report that India will add 30 GW of energy storage capacity - including battery and pumped storage - through standalone and FDRE projects by June 2027.

India's power sector is undergoing a structural shift as the country advances toward its target of 500 GW of clean energy capacity by ...

India's Battery Energy Storage Systems (BESS) sector witnessed notable developments in July 2025, marked by key policy ...

With a significant increase in renewable energy generation capacity, it is imperative that storage facilities are developed to help India and the world transition to clean energy.

The report indicates that Battery Energy Storage Systems (BESS) and Pumped Storage Projects (PSP) will form the backbone of this energy storage expansion. BESS ...
