---

The report positions solar energy not just as a complementary force to Norway's hydropower dominance, but as a key player in the country's broader climate strategy.

Store Norske Energi, a state-owned energy company based in Longyearbyen, is testing whether solar energy could be used to transition Spitsbergen to emissions-free, hybrid energy.

While hydropower has long been the country's backbone, the solar revolution and what it can mean for Norway is rapidly changing the ...

The report positions solar energy not just as a complementary force to Norway's hydropower dominance, but as a key player in the ...

As Norway accelerates its transition to renewable energy, the SunContainer Innovations Energy Storage Power Station in Bergen stands as a critical infrastructure project.

When properly matched to application requirements, modular solar power station containers provide a structured and adaptable foundation for reliable microgrid and hybrid ...

Energeia secures Norway's largest solar power concession to date at 46 MWp. Learn how this project and key battery storage partnerships are shaping the nation's energy ...

The project is Norway's first deployment of a transmission grid connection solution featuring SF6-free EconiQ. The collaboration underscores both companies' commitment to ...

The study suggests that adopting a combination of renewable energy sources, such as wind, solar, and hydropower, can help ensure a reliable and consistent energy supply while ...
