-----

Bidirectional charging, such as Vehicle-to-Grid, is increasingly seen as a way to integrate the growing number of battery electric vehicles into the energy system. The electrical ...

The Bidirectional Charging project, which began in May 2019, aimed to develop an intelligent bidirectional charging management system and associated EV components to ...

The new product architecture will feature game-changing innovations such as bidirectional charging and speeds up to double that ...

The standard provides vehicle manufacturers and electric vehicle supply equipment with the technical parameters to enable the bidirectional charging of electric vehicles.

Since its inception in 2022, XCharge NA has developed a suite of products designed to enhance the efficiency and accessibility of EV charging, most recently launching its GridLink product ...

Headquartered in San Francisco, Bidirectional Energy partners with automakers, charger manufacturers, and utilities to bring bidirectional charging from pilot projects to mass ...

The standard provides vehicle manufacturers and electric vehicle supply equipment with the technical parameters to enable the ...

ChargePoint recently announced a generational leap in AC Level 2 charging technology. The new product architecture will feature ...

The new architecture arises from ChargePoint's nearly two decades of industry leadership designing and deploying innovative ...

At the Port Newark Container Terminal in New Jersey, solar panels have been shoehorned into a tightly
