Should Portugal produce battery-grade Li-compounds?

Therefore, the production of battery-grade Li-compounds in Portugal would aid the EU in lessening its dependence on external sources for this strategic metal, assisting as well in increasing the domestic supply of raw materials for battery manufacturing. Portugal has been the sole European lithium producer since 2011 (USGS 2024).

Do Portuguese Li resources support Li-ion battery needs?

The growth of BEV production is leading to increased demand for lithium (Li), which will sharply rise in the following decades unless affordable alternatives emerge. We evaluate this demand surge and the role of Portuguese Li resources in supporting Li-ion battery needs for Portugal and the European Union (EU) BEV market.

Why should Portugal invest in a battery factory?

"Our factory will not only create new jobs but will also place Portugal at the forefront of the production of batteries for electric vehicles in Europe," he highlights. According to CALB, "this strategic investment" aims to "reinforce its presence in the European market for electric vehicles (EV) and energy storage systems (BESS)".

Why is battery recycling important in Portugal?

Battery recycling is also ensured with B.again, an initiative by DST Solar. This integration of the entire battery value chain within a 260km radius places Portugal in a privileged position in the sector, establishing itself as one of Europe's leading hubs for battery development and innovation.

Portugal's electricity network is undergoing a quiet revolution. Investors are shifting from a race to install ever-larger solar fields toward a more nuanced goal: pairing panels and ...

The critical question addressed here is whether Portugal's Li reserves are sufficient to meet the Li demand for its electric mobility transition and to determine Portugal's potential ...

The 48 battery containers planned at the project, which Hyperion submitted to the DGEG in 2019, would each contain 5,015 kWh ...

SunContainer Innovations - Portugal, with its abundant lithium reserves and commitment to renewable energy,

has emerged as a key player in the lithium power storage sector.

What if a mobile solar container project could slash energy bills and deliver 18-24% annual ROI? Let's break down how Portugal's solar revolution makes this possible.

In August 2025, GSL ENERGY deployed two high-performance energy storage systems for a client in Portugal. The systems utilize the latest wall-mounted 51.2V 200Ah 10.24kWh lithium ...

The project to build a lithium battery factory for cars owned by the Chinese company CALB in Sines, with 15 GWh (Gigawatts/hour) of ...

Northvoltinsists that the Portuguese plant will be "the largest and most sustainable integrated lithium conversion plant in Europe" and "a milestone in the development of a European battery" ...

Portugal's electricity network is undergoing a quiet revolution. Investors are shifting from a race to install ever-larger solar fields toward ...

In the era of decarbonisation of world economies, Portu-gal intends to create a lithium and battery manufacturing industry in the border areas between Portugal and Spain, in order to meet the ...

The 48 battery containers planned at the project, which Hyperion submitted to the DGEG in 2019, would each contain 5,015 kWh of the same Sungrow products. The developer ...

Opportunities and challenges in lithium exploration - The interview also addressed lithium exploration, a crucial resource for battery production, with Portugal holding the largest lithium ...
