What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.

What are solar tile roofs?

Solar tile roofs are roof shingles with built-in photovoltaic cells. SunTegra is one of the leading providers of these solar roof tiles in the US, and their products can easily integrate with both asphalt shingle and concrete tile roofs.

Are SunTegra solar tiles suitable for commercial buildings?

SunTegra solar tiles are suitable for commercial buildings as well as homes and carports. SunTegra Solar Shingles are designed to replace asphalt shingles, but they are also compatible with other low-profile roofing materials.

How do solar tiles work?

Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof. Photovoltaic cells in solar tiles turn sunlight into direct current (DC) energy.
