With rising temperatures and energy costs, solar air conditioning in Romania has emerged as a game-changer for eco-conscious homeowners and cost-aware businesses.

In many areas of Romania, especially southern areas, the solar irradiation and sunshine duration have high values and are favourable to capitalize the solar energy by using solar air collectors, ...

The study presents a global evaluation of the potential to use solar radiation in the air conditioning with application to an office building located in Cluj-Napoca, Romania.

The paper presents experimental results of a solar collector air, in climatic conditions from South Eastern Europe.

Prin integrarea unui sistem HVAC solar, participati la tranzitia catre solutii energetice mai sustenabile si mai ecologice. Nu uita, utilizarea energiei solare pentru nevoile ...

The energy used to create comfort in the first passive house built in Romania, which was designed for offices, analyzed by the authors, is using both geothermal and solar ...

Romania's updated national energy and climate plan (NECP) targets a 38.3% share of renewable energy in gross final consumption by 2030, up from 36.2% in the draft and ...

Romania's updated national energy and climate plan (NECP) targets a 38.3% share of renewable energy in gross final consumption by ...

In this context, the study and the evaluation of potential to use solar radiation in air conditioning applications is of high importance and interest worldwide and also in Romania, ...

Romania's shift to renewables focuses on solar panels, aiming for energy independence, reduced emissions, and sustainable development.

Romania uses solar air conditioning
