This report reviews drivers of grid-scale storage deployment in the United States, identifying progress and barriers to a robust storage landscape, with a focus on the economics ...

Ever wondered who's obsessed with energy storage stats? Spoiler: It's not just engineers in lab coats. This article targets three main groups:...

Storage deployment in the United States grew across all segments and is forecast to grow another 25% in 2025, according to Wood Mackenzie. Across all segments, including ...

Texas and California continue to lead the market, with 61% of the total installed capacity in Q4, while the remaining 39% was installed across 13 states, expanding storage ...

A field of Tesla megapack batteries. U.S. utility-scale battery storage capacity will reach almost 65 GW by the end of 2026, according ...

US energy storage set a Q1 record in 2025 with 2 GW added, but looming policy changes could put that growth at serious risk.

New York's 6 GW Energy Storage Roadmap, which recommends the deployment of six GW of energy storage, also authorizes funds for NYSERDA to support 200 megawatts ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record ...

Globally, energy storage project development is increasingly driven by the utility-scale segment, with mandates and targeted auctions driving gigawatt-hour projects in markets ...

A field of Tesla megapack batteries. U.S. utility-scale battery storage capacity will reach almost 65 GW by the end of 2026, according to the Energy Information Administration.

## Scale of new energy storage field
